

CUSTOMER QUALITY COMPLAINT NOTIFICATION

Reference: CQC/2026/07/0142 | Date: 12 July 2026

To: Quality Assurance Department, Generic API Manufacturing Ltd.
From: Sourcing & Quality Cell, Meridian Life Sciences Pvt. Ltd.
Subject: Complaint regarding contamination in Metformin Hydrochloride API supply

1. Product Details

Product Name	Metformin Hydrochloride API
Strength / Grade	IP / BP Grade
Batch / Lot Number	MFA260712A
Manufacturing Date	12 January 2026
Expiry / Retest Date	11 January 2028
Quantity Supplied	500 kg (10 HDPE drums)

2. Nature of Complaint

During incoming quality inspection at our facility, visible dark brown/black particulate contamination was observed in 2 out of 10 HDPE drums received under the above batch. The affected drums showed foreign particulate matter suspended within the powder, inconsistent with the expected white to off-white crystalline appearance of Metformin Hydrochloride API. The remaining 8 drums appear visually unaffected but have been placed on hold pending investigation.

3. Quantity Affected

Approximately 100 kg (2 HDPE drums) confirmed affected at the time of this notice. The remaining 400 kg (8 drums) is under quarantine pending further inspection.

4. Action Requested

We request an urgent root cause investigation, CAPA plan, and Certificate of Analysis re-verification for this batch. Please advise on replacement or credit note for the affected quantity at the earliest, given the potential impact on our downstream finished dosage form (FDF) manufacturing schedule.
